Full Stack Developer

Software Engineer with 3+ years building and scaling production web applications using React, TypeScript, and Node.js. Specialized in micro frontend architecture, UI performance optimization, and full-stack feature delivery. Experienced leading frontend systems end-to-end — from design review and component architecture to accessibility, code quality, and production stability. Comfortable using AI-powered tools to accelerate development velocity and integrating cross-functional feedback from designers, PMs, and backend teams.

WORK EXPERIENCE

BlackHawk Network

Software Engineer • Full-time

11/2024 – Present

Bangalore, India

- Led front-end development of a **scalable micro frontend widget platform** powering multiple product teams, accelerating feature delivery by **30%**
- Architected shared component libraries and design system integrations, reducing code duplication by **30%** and improving cross-team maintainability
- Improved LCP/FCP by **40%+** using code splitting, lazy loading, and memoization; implemented caching strategies (cache-aside, TTL) cutting API response times by **50–70%**
- Reduced redundant API calls by 25% via **TanStack Query** for client-side caching, request deduplication, and optimized data-fetching patterns using debouncing and batching
- Standardized UI components with **Storybook**, reducing inconsistencies by **35%** and enabling faster design-to-code handoff with designers and PMs
- **Led code reviews** and enforced TypeScript best practices across the team, improving code quality and reducing runtime errors in production
- Ensured **WCAG accessibility standards** across widget components for applications serving thousands of users
- Used **AI-assisted development tools** to accelerate scaffolding, refactoring, and debugging workflows
- Wrote unit and integration tests using **Jest/Vitest** and **React Testing Library**, maintaining coverage standards across shared component libraries
- Enhanced accessibility compliance to **WCAG 2.1 AA** across key user flows, ensuring a more inclusive experience for thousands of users

Wipro Limited

Project Engineer • Full-time

07/2022 – 01/2024

Chennai, India

- Built fullstack internal tools using **React, Node.js, and REST APIs**, improving enterprise team efficiency by **20%** through scalable architecture
- Built scalable REST APIs using **Node.js and Express.js**, reducing response times by 12% for data-intensive enterprise workflows
- Delivered modular, reusable frontend components integrated with backend data pipelines for cross-functional business teams
- Collaborated with stakeholders across product, design, and infrastructure to translate requirements into reliable, maintainable software

EDUCATION

Bachelor of Technology in Computer Science

Vellore Institute of Technology

Vellore, India • 07/2018 – 07/2022

PROJECTS

Fullstack E-Commerce Platform | Next.js · NestJS · TanStack Query · Prisma · MongoDB · TypeScript

- Designed and built a fullstack eCommerce platform with scalable architecture and modular code structure
- Implemented OAuth authentication, improving user onboarding and security
- Improved initial load performance by 35% using SSR and optimized rendering strategies
- Reduced runtime errors by 40% using schema validation (Zod)
- Optimized backend queries using pagination and indexing, improving response efficiency under larger datasets
- Designed cache-aside strategy to reduce database load under repeated queries
- Implemented rate limiting and performance optimizations for API stability

SKILLS

Languages: TypeScript, JavaScript (ES6+), Java

Frontend: React.js, Next.js, Redux, TanStack Query (React Query), Tailwind CSS, ShadCN UI, HTML, CSS

Backend: Node.js, NestJS, Express.js, Prisma ORM (Indexing, Query Optimization), REST APIs, OAuth

Databases: Postgres, MongoDB, MySQL

Performance: Lazy Loading, SSR/CSR/SSG, Memoization, Code Splitting, API Optimization, Caching (Cache-Aside, TTL)

Concepts: System Design, Data Structures, Problem Solving, Scalability, Microservices, Micro Frontend Architecture

Tools: Storybook, Git, Postman, Chrome DevTools, Lighthouse, Docker, Jest, Vitest, React Testing Library
